

I object to the expansion of LPFM or any other technology that will negatively impact existing FM translator stations. My community is well served by K-Love that uses the translator stations. This station is important to me and my family, it is our primary radio station. The effect on the Lexington Kentucky area would be profound were this station to be lost. It is evident in the level of support that is given here. This support has for many years supported a K-Love station and K-Love's sister station, and recently an additional K-Love station has been added to serve this area more completely. The public interest is well served with this station that clearly follows not only moral values, but laws and regulations laid out by the FCC. Again I strongly object to anything that will lead to the loss of K-Love Radio in my area.
